

VED - A Mission

Vidarbha, the centrally located region of India has tremendous potential to develop into an economic force. Its rich natural resources, the mineral & forest wealth, rich cultivable land, mega thermal power generation and convenient geographical location are waiting to be tapped. VED is a mission, which aims at achieving speedy economic development of Vidarbha through tapping these resources & speeding up all barriers that create bottlenecks.

Vidarbha Economic Development Council (VEDC), an NGO, was established in 1995 by Vidarbhaites, to proactively work for the economic development of this developing region of Maharashtra. It is a non-political organization, which works as a mission to survey, identify, study, analyze and then pursue various thrust areas, which can dramatically transform the economy of this region. The Multi Modal International Hub Airport at Nagpur (MIHAN) is one of its success stories, which will provide alternative employment opportunities to the people of this region. With this goal in view the following thrust areas are being pursued:
